

Secur Loc Clasps

Endur ID's Designed to Secure Endur ID's Secur Max Wristband

Secur Max bands are printed using a standard laser printer and then adhered to the individual using a simple adhesive closure. The adhesive closure allows for infinite adjustment for size and easy application, however, adhesive closures can be picked open.

Patent # 9,339,408 B2

To secure the band from removal and make for a more tamper proof identification band the Secure Loc Clasp is placed over the adhesive area making it inaccessible. The patented Secur Loc clasp has internal ribs to prevent sliding on the band and 4 locking mechanisms to lock the clasp shut. These clasps are not designed to be removed or reused making an unlocking mechanism irrelevant.

Color Coding using the Secur Loc Clasps

To enhance any internal procedure Secur Loc Clasps are available in 8 colors

- Secur Loc 300 Natural
- Secur Loc 300 Blue
