

Secur Trac™

ENDUR ID and Data Capture Solutions have developed **Secur Trac™**, a software Solution designed to track and monitor the security, health and well being of individuals detained in a secured environment. Utilizing a barcoded wristband and mobile scanning device, individuals are scanned throughout a facility to track all levels of attendance, security, movement and activities.

Secur Trac™ for Secure Environments:

Such as:

- CORRECTIONS - FEDERAL / STATE / COUNTY
- ICE DETENTION CENTERS
- BORDER PATROL
- JUVENILE DETENTION CENTERS

Secur Trac™ Supports the FEDERAL PERFORMANCE BASED DETENTION STANDARDS of 2011, developed by the Department of Justice.

- Supports the Government Contract Quality Assurance Program.
- Maintains detainee records and ensures their security and confidentiality.
- Improves the process for reporting and responding to complaints.
- Reduces risk associated with potential litigation.

Secur Trac™ Core System Functionality/Overview:

- ★ Initial Intake Processing:
 - Wrist-banding
 - Personal Items
 - Health Assessment timing and completion
- ★ Housing Assignments/Roll Call Counts:
 - Cells/Bed Assignment management
 - Tracking/Head Counts by housing unit with Face to Photo
- ★ Activity Tracking
 - All detainee movement scanned & tracked
 - Managed by Activity/Location/Hours logged
- ★ Meal Tracking
 - Meal records tracked/reported
- ★ Visitor Tracking
 - Time and visitor type tracked/managed
- ★ External Appointment Tracking
 - Detainee external appointments management
- ★ Pill/Medication Disbursement Tracking
- ★ Medical/Infirmary Visit Tracking
- ★ Detainee Movement and Escorting Activity Tracking
 - Transit times from cells/beds to activities tracked/reported
- ★ Discharge Process/Tracking/Property Return
- ★ All scanned activities linked to unique user login to show contact and chain of custody

Secur Trac™ is comprised of five components:

- ENDUR ID WRISTBAND MEDIA
- SECUR TRAC™ SOFTWARE
- WEB FRONT END (Facility/User Setup and Reporting)
- HANDHELD MOBILE SCANNING DEVICES
- IDMX™ IDENTIFICATION MANAGEMENT EXPRESS

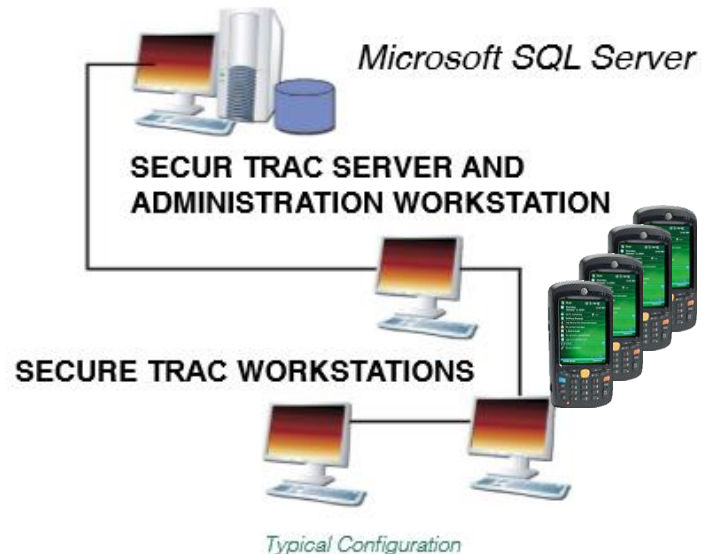

Secur Trac™

Reporting :

- All scanned activity can be formatted into any site-specific required formats for reporting needs.
- System allows exporting of reports to Excel and PDF formats
- Reports included but not limited to:
- Detainee History: show every scanned event for an individual from admission to release
- Head Counts by housing unit
- Hold Cell and Security Checks (activity performed and compliance level reporting by time/frequency)
- Logs Medical Visits
- Meals Taken/Not Taken (w/Hunger Strike notifications)
- Time spent in/attending specific activities, classes, off-site appointments

Example of printed wristband with labels

Secur Trac™ Minimum System Requirements for Backend System:

Server:

- Hardware/Storage - 40 GB free space, RAM - 4GB [Recommended 8 GB]
- OS/build-version [Window Server 2008 or later]
- Tools required: SQL Server version/Microsoft.
- MSSQLServer 2014 Standard Edition SQLCE 3.5 (32bit & 64Bit both) .NET framework 4.6]

Desktop:

- OS/build-version [Windows 7 or later]
- Tools required(Microsoft components etc.)
- [Windows Mobile Device Center, SQLCE 3.5 (32 bit & 64 bit both) .NET framework 4.6, Microsoft Excel 2013 or above, IE 9.0 or above]

Network:

- Connectivity speeds (LAN/WAN) [LAN - 100 Mbps]
- Wi-Fi: [54 Mbps] and WPA2 PSK security
