

IDSS-C

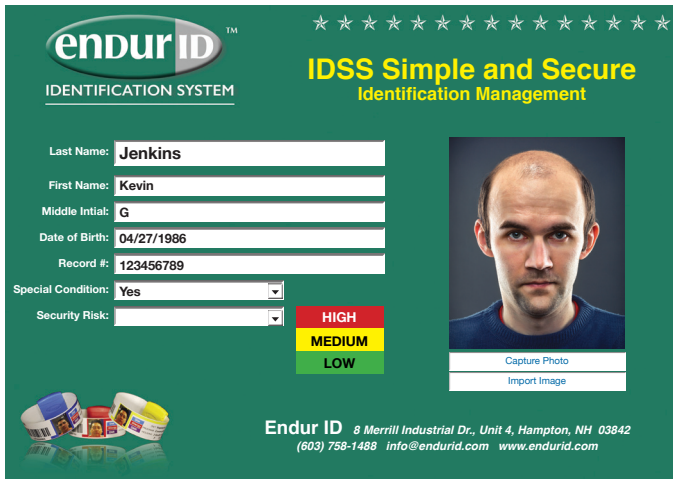

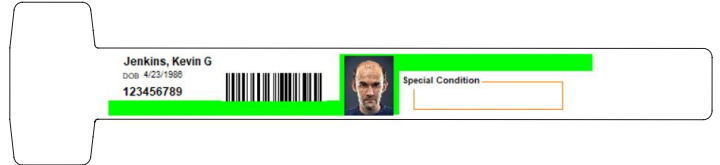

Identification Simple and Secure

Stand Alone Wristband Kit

Correction

Endur ID's new Simple and Secure software IDSS, is a standalone identification kit developed for smaller facilities in need of a method to create dynamic Inmate Identification Wristbands. The IDSS identification kit includes advanced features such as Bar Coding, Photos and Color Coded Warnings and Alerts.

SML-1-LA - Wristbands with Labels

The Base kit includes the Software and 50 Wristbands and Secure Clasps. There is an optional Camera and Printer.

Features:

- Software Provided on a USB*
- Easy install – No IT support required
- Designed for Simplicity and Intuitive Operation
- Demographic Data Entry Screen
 - Risk Identification and Color Coding
 - Special Conditions can be noted
- Easy Sort and Search Functions
- Photo Capture, with cropping and a choice of 9 different exposures
- Two Pre - Formatted Endur ID Wristband Options
 - XSM-1-LA Secur Max Wristband
 - SML-1-LA Secur Max Wristband / Label Sheet
- Security and User Administration
- Easy future upgrade to Endur ID's IDMX Integrated Identification Express

IDSS is formatted with multiple Endur ID templates. Simply choose the wristband type that best meets your facility's needs. Simply enter the demographic data, save and print wristbands. Printed wristbands are waterproof and resistant. Endur ID wristband media is PVC and latex free. IDSS needs only to be installed on a PC with Microsoft Windows 7 or above, and an appropriate printer. IDSS stores all saved wristbands making replacement bands easy to reprint. Should your facility's needs grow, IDSS can be upgraded to our fully customized identification solution IDMX.
