2014 MS SQL Server Express Advanced link, (download includes 2014 SQL Management Studio)

Check System Folder for 64 bit or 86 bit install (most likely will be a 64 bit)

Installation Steps for MS SQL Server from Thumb Drive

Step 1 – Install SQL Server file: SQLEXPADV_x64_ENU.exe

– New SQL Standalone/ Accept Terms/ Hit Next/ Install

Step 2 – Features

– Select All/ Hit Next

Step 3 – Instance Configuration

– Hit Next

Step 4 – Server Configuration

– Hit Next

Step 5 – Database Engine Configuration

– Server Configuration Tab/ Check the Mixed Mode Radial Button/ Password = dbadmin (if network admin password is required to create database, then use network admin password)/ Hit Next

Step 6 – Reporting Services Configuration

– Install and Configure/ Hit Next

Step 7 – Reporting Services Configuration

– Hit Close

Installation Steps for SQL Management Studio

Step 1 – Go under Start to Programs

Step 2 – Say ‘No’ to Older Versions of SQL on System

Step 3 – Connect to Server

– Select Current (Newly Named) Database/ Copy Name/ Hit Connect

Installation Steps for IDMX Software

Go to Thumb Drive/ Installation Files folder

Step 1 – Extract Files

Step 2 – Registration Info

– Input Name & Serial Number

Step 3 – Go back into Mgmt Studio 2014 to Run Scripts

– Open file/ Find file (go to C drive, IDMX Server folder, Database Scripts folder, select ‘Create_LexIDDB.SQL’ file/ Select All/ Execute

Step 4 – Find Script (Security)

– Open file/ Find file (go to C drive, IDMX Server folder, Database Scripts folder, select ‘Default_Security.SQL’ file/ Select All/ Execute

Step 5 – Copy ini File

Location – Paste in IDMX Share Folder/ Replace IDMX Share Path to IDCSQLShare on C Drive

Database – Paste in New Data Source Name (Current Database Name)

* DO NOT CHANGE Initial Catalog

– Save

Go to Landing Page/ Select Help

- Select Register for Software Activation

- Email Serial # and Activation Password to activation@idcardtek.com

(If computer where IDMX resides has email capabilities, then hit Copy to Clipboard button and copy and paste info from Clipboard to email)

Troubleshooting

- If error message with path to older Mgmt Studio version comes ups during initial login to IDMX, go to IDMX.cfg file in IDMX Server folder/ IDCSQL Share folder
- Update Data Source Name to match Data Source name on ini file
